Class Diagram (Email System)

Following the UML (Unified Modeling Language) System, define to be a system using some kind of graphical notation. The UML system will break down to have different type of graphical method system it uses to represent the model. There is the activity, use case, sequence, class, and state diagram. For today, we will be focus on the **class diagram**.

Below is a figure showing the email system that was given to us and we will be presented using the class diagram and show the relationship with each requirement that was given.

Legends

-  Class
-  Attributes
-  Functions
